Introduction

BACKGROUND

1 This Statistical Bulletin summarises the results of a survey of Children in Need and the activity and expenditure reported by Social Services in respect of provision for Children in Need in a 'typical' week in February 2005.

2 The 2005 survey is the fourth comprehensive national survey covering all Children in Need: that is, children who are known to their Local Authority Social Services as requiring the provision of services.

3 Provisional headline results for England were published in November 2005. This report is based on finalised data and includes further analysis of the national figures, and a Local Authority breakdown of the main Children in Need figures for England.

4 Following the publication of the headline results, some authorities have submitted slightly revised returns. In view of these updates and data corrections, the England totals in this analysis differ slightly from those published in November. Revised versions of the tables included in the Statistical First Release are included in this report as Tables 1-4.

5 Previous surveys were held in February 2000, September/October 2001 and February 2003. Publications containing the results of previous surveys are available at http://www.dfes.gov.uk/cgi-bin/rsgateway/search.pl?cat=3&subcat=3_1&q1=Search

6 The background to the survey, and comments on the quality and completeness of the data and their presentation, are given in the Technical Notes (attached at Appendix A).

COVERAGE OF SURVEY

7 This survey covered all Children in Need and all activity recorded in a census week in February 2005. The survey included all Children in Need who received services from Social Services in England - that is, Children in Need upon whom Local Authorities expended resources, either in terms of costed staff or centre time, or in terms of payments for placements or other services received by the child, including one-off

payments (further information on coverage is given in Appendix A).

8 All activity was costed and all expenditure made to or on behalf of the child in the census week was included. This was to ensure that the Children in Need census accounted for as much as possible of the total expenditure by the authority on children's services during the survey week.

9 As with the previous censuses, the 2005 census covered all provision paid for by Local Authority Social Services on behalf of Children in Need, whoever provided the service - i.e. whether the service was provided directly by the Local Authority, or by the private or voluntary sector under commissioning arrangements.

GROSSING UP OF RESULTS

10 In total, all 150 authorities made returns for the 2005 census although one authority was not able to provide any financial information and three other authorities have indicated that they have not provided complete activity information. It is not possible to accurately estimate the effect of these omissions so the figures for England have not been updated to take them into account. The authority with no financial data accounts for 0.3% of the 0-17 age group in England, as at mid 2004 so it is estimated that if the expenditure figures were updated to allow for this authority the total expenditure on Children in Need might increase by around £0.2m from £68.5m.

INTERPRETATION

11 Reference data collected through the Children in Need census is not an indication of prevalence of any factor in the general population, but is only an indication of prevalence amongst the Children in Need population. For example, the reference data collected through the survey on the number of children with a disability, or with autism, is not a measure of the number of children in the general population who are disabled or autistic, but data on the number of disabled/autistic children in touch with Social Services

NATIONAL SUMMARY TABLES

Each of the following tables gives summary national figures aggregated from figures provided by individual Local Authorities for a sample week in February 2005 (a 'typical' week as chosen by the Local Authority). All tables are based on data for children who were active (i.e. received a service) during the survey week, unless explicitly stated otherwise.

Updated Statistical First Release Tables

- Table 1 Children reported on the CIN database
- Table 2 Total weekly costs as reported on the CIN database
- Table 3 Average cost (£ per week) per child receiving a service
- Table 4 Children in Need: Time spent with teams or at centres

Other National Analyses

- Table 5 Distribution of children by need code
- Table 6 Expenditure on children by need code
- Table 7 Average cost (£ per week) per child receiving a service by age, sex and need code
- Table 8 Age distribution of children served
- Table 9 Ethnic distribution of children served
- Table 10 Ethnic distribution of children served, by age
- Table 11 Summary distribution of children by ethnic category and need code
- Table 12 Summary distribution of children by ethnic category and disability
- Table 13 Disabled children receiving a service, by sex
- Table 14 Comparative spend on disabled children
- Table 15 Age distribution of disabled children served
- Table 16 Distribution of disabled children by need code
- Table 17 Autistic children receiving a service, by sex
- Table 18 Comparative spend on autistic children
- Table 19 Age distribution of autistic children served
- Table 20 Asylum seeking Children in Need receiving a service
- Table 21 Asylum seeking Children in Need, by ethnic category
- Table 22 Other Children in Need receiving a service
- Table 23 Analysis of expensive children served
- Table 24 Comparison of key data in February 2000, September/October 2001, February 2003 and February 2005

LOCAL AUTHORITY TABLES

Each of the following tables gives figures for individual Local Authorities for a sample week in February 2005 (a 'typical' week as chosen by the Local Authority). All tables are based on data for children who were active (i.e. received a service) during the survey week, unless explicitly stated otherwise.

Table A Incidence of Children in Need (CIN) in census week

Table B Numbers of children receiving services in CIN census week

Table C Proportion of Children in Need (CIN) served during census week

Table D Expenditure incurred by Social Services on Children in Need in census week

Table E Average cost (£ per week) per child receiving a service

Table F Children receiving services in week, by category of need: All Children in Need

Table G Percentage breakdown of children receiving services in week, by category of ethnicity: All Children in Need

Table H Disabled children receiving services in CIN census week

Table J Autistic children receiving services in CIN census week

Table K Asylum seeking children receiving services in CIN census week

Within each table, authorities are shown by region and within each region by type of authority. Overall figures by type of authority are given at the foot of each table.

Appendix A

TECHNICAL NOTES

Coverage of the CiN surveys

1 There are two main categories of children covered by the Children in Need surveys: all the Children in Need on the books of Social Services; and all Children in Need who received services from Social Services in England – that is, Children in Need upon whom Local Authorities expended resources, either in terms of costed staff or centre time, or in terms of payments for placements or other services received by the child, including one-off payments.

2 To keep the amount of data collected to a manageable level, all Children in Need surveys have collected information for a “typical/ representative” week, on this occasion on a week in February 2005. Local Authorities were free to choose which week this was, for example by excluding any half term week in the month. However, a “typical” week is unlikely to be entirely typical in terms of coverage, since almost any week will have at least one “atypical” feature for some element of service.

Recording of open cases

3 The figure of 385,900 Children in Need given in national table 1 includes all children ‘on the books’ of Social Services, which in principle ought to include all Children in Need whether or not they received a service from the Local Authority in the week. In practice the position is more complicated than this, not least because Local Authority practices appear to vary in defining what constitutes an “open case”, and because of differences in reporting practice between the two dates as noted in the next paragraphs.

Comparison of numbers between 2000, 2001, 2003 and 2005

4 In the CiN survey in 2000, there were a number of authorities whose overall figures of total children were subject to margins of error because of one or other of the following factors:

- (i) In many authorities there were a large number of files of cases which were inactive but had not formally been closed. Many authorities mounted a “spring clean” of their records to remove these cases, before the survey started. There were probably some dormant cases in the figures which ought to have been removed. This might have led to a slight overstatement of numbers in CiN 2000;
- (ii) In some other authorities, the Children in Need figures only included those Children in Need who actually received a service in the week. Local Authorities who adopted this approach did so

because of resource constraints in their data management teams. This will have led to an understatement of numbers in the authorities concerned;

- (iii) Time between loading of data onto the Children in Need database and the survey census week which resulted in a large number of new cases of children which had to be added at a late stage, but for which much of the reference data was missing;
- (iv) The inclusion of cases that had been closed between the dataload on the database prior to the survey and the survey itself.

5 Of the above factors, (iii) and (iv) may still have had some effect in the three latest censuses, though it is probably much less marked than in 2000. Most authorities have now done major spring cleans of their records, so (i) is only likely to be significant in CiN 2000. A scrutiny of the returns for 2001 onwards shows that there were apparently no authorities who excluded from their CiN returns children who did not receive a service in the census week and only one authority who did so in 2005 so the effect of (ii) is also not likely to be significant for 2001 onwards.

6 The inference is that the comparison of total Children in Need on the books of Social Services between 2000 and future years may have been influenced by reporting problems in 2000 which have now largely been rectified. A much better and more robust basis of comparison between all CiN collections is to use the numbers of children receiving a service on the four occasions, and this is the basis of comparison used throughout the report.

Quality of the data

7 At the England level the data appear robust. However, there is much more variation in the data at Local Authority level, as the tables included in this publication show. Some of this variation may result from actual authority practice in the provision of services. In other cases, it may reflect in part differences in reporting. This is especially true for the expenditure data, as shown in the following paragraph.

8 As mentioned in paragraph six of these technical notes, the data included in the tables of this volume are, unless indicated otherwise, based on all children who were classified as being ‘active’ during the survey week. A child is classified as being active if during the survey week they incur a cost or receive a service that costs their Local Authority money. Therefore, differences between authorities in the ways they account for

expenditure can also affect their numbers of 'active' children.

Cost comparisons

9 In the case of the cost data, the survey has indicated differences in the way LAs account for their administrative and other overhead costs, which may have distorted the figures for a few individual LAs. Very great care is needed in interpreting these figures. Further work is needed to understand the significance of these figures and the reasons for the apparent variations between authorities.

Reconciliation of CLA numbers and the effect of respite care

10 The Children Looked After report for 31 March 2005 gives a figure of 60,900 Children Looked After at that date, excluding children looked after under a series of short term placements. This is lower than the figure of 62,900 (excluding the 9,700 children receiving respite care) from the 2005 Children in Need census of the number of Children Looked After cases recorded as open during the survey week. This is because the CiN survey covers all children looked after at any time during a seven day period rather than on just one day.

11 In the Children Looked After report for the year to 31 March 2005, 11,400 children were recorded as being looked after under a series of short term placements at any point during the year. In the Children in Need 2005 census, around 9,700 children were recorded as receiving respite care. This may indicate that some children receiving respite care have not been recorded as such in the CiN census.

General notes on the content of the tables

12 As mentioned in paragraph 10 of the introduction to this volume, all 150 authorities have submitted a CiN return but a few authorities have indicated that the information they have provided is not complete. West Berkshire was unable to provide financial information and, as a consequence of this, their numbers of children receiving services will be an undercount. In addition, Bristol, Doncaster and Newham have indicated that they have omitted some information. The figures from these authorities have been included in the Local Authority tables as reported.

Appendix B

CONFIDENTIALITY – SUPPRESSION AND ROUNDING

1 To ensure that no individual can be identified we have suppressed very small numbers and rounded figures. All figures of five or less have been suppressed. Data that would enable the calculation of missing figures have also been suppressed.

2 All numbers which appear in the national summary tables (Tables 1 to 24) have been rounded to the nearest 100 if they exceed 1,000 and to the nearest 10 otherwise. Percentages have been rounded to whole numbers, but where the numerator was five or less, or the denominator was 10 or less, they have been suppressed and replaced by a hyphen.

3 At Local Council level (Tables A to K) the England total numbers at the head of each table have been rounded either to the nearest 10 or 100 following the rules outlined above. All other numbers have been rounded to the nearest five, and numbers from 1 to 5 inclusive have been suppressed, being replaced in the published table by a hyphen. Percentages have been rounded to whole numbers, but where the numerator was five or less, or the denominator was 10 or less, they have been suppressed and replaced by a hyphen. Where a percentage is zero because the number from which that percentage has been calculated is a zero, the percentage is shown as zero.

4 The rounding conventions have not been applied to data which shows expenditure in £millions (for example, in Table 2). Here, figures have been shown rounded to one decimal place (i.e. to the nearest £100,000). In addition, average cost data has been rounded to the nearest £5.

5 In tables which include time series information, this rounding convention has been applied to data for previous years for the sake of consistency, even though unrounded data for these years may have been published in previous publications.
